 - o Road & road reconstruction
 - o Rational method storm water
 - o Grading and site works

Integrates modelling, design and drafting

- Automatic production of:
 - o long and cross sections
 - o reports and tables
 - o dynamic 3D project models

"Civil Site Design does the business...no doubt. As a user for 10 years now, I can say that the innovation brought to this software in terms of usability and presentation especially in the last 2 years is breath-taking. The team behind the development and support are right at the top of their game in understanding what we need as designers. Keep it coming!"

Peter Thomson, Senior Civil Designer - Dunedin
